# Project Description

- A 2-year planning type project: August 1, 2023 – July 31, 2025
- A preliminary investigation into library-community partnerships during public crises, focused in 3 key areas:
  - Emergencies
  - Scope and Nature of Partnership
  - Role of Libraries in Partnership
- Libraries of all types have provided services to their users during many types of emergencies—but emergency response groups may not know of or recognize the role that libraries can take to support emergency preparation, response, and recovery.
- Project will fill a research gap in understanding the extent of library-community partnerships during emergencies and begin laying the groundwork for future research in this area.

# Year 1: August 1, 2023 – July 31, 2024

## Case Study Survey of Illinois Libraries

- Online survey targeting multi-type Illinois libraries.
- Illinois will serve as a case study and microcosm of the greater national library-community partners situation.
- State advisors will be key to disseminating the survey to their community members.
  
- Will generate a fundamental understanding of the emergencies that libraries respond to, the scope and nature of library partnerships during emergencies, and the role of libraries in these partnerships.

# Year 2: August 1, 2024 – July 31, 2025

## Community Engagement Roundtables

- Building upon Year 1 survey results, two virtual two-day Community Engagement Roundtables (CERs) will be developed to raise the conversation to the national level.
- 20-25 panelists and at least 100 participants will be invited to join the CERs.
- *CER I (Jan. 2025):* Will identify gaps in library-community partnership based on survey findings.
- *CER II (Feb. 2025):* Will focus on initial successes in library-community partnerships and ideas of collaborative strategies.

# Intended Results

- Intended results correspond to the project's 3 key areas:

Area	Result
<b>Area 1: Emergencies</b>	<p><i>Identification of the types of emergencies that libraries have responded to in the past, are currently responding to, or have created plans to respond to.</i></p> <p>This result will inform understanding of the scope and extent of library-community partnerships, as partnerships may vary depending on the specific challenges and needs related to emergency type.</p>
<b>Area 2: Scope and Nature of Partnership</b>	<p><i>Clarification of the scope and extent of library-community partnership during emergencies.</i></p> <p>This result will inform understanding of if or if not library-community partnerships during emergencies exist; if not, why they do not exist, and if so, what is the nature of the partnerships, and how have they been developed and maintained?</p>
<b>Area 3: Role of Libraries in Partnership</b>	<p><i>Description of the past, current, and future role that libraries play in partnerships with community partners during emergencies, and suggestions for the future role of libraries in partnership during emergencies.</i></p> <p>This result will inform both libraries and community partners of how libraries can play an equal part in emergency preparation, response, and recovery, help to develop initial recommendations for libraries to follow for successful partnerships, and provide further paths of future exploration on libraries' role as emergency partners.</p>
